

LifeLink Placental Tissue Capabilities

LifeLink Tissue Bank Can Be Your Source for Placental Tissue Acquisition, Development, and Processing

Distribution

- Distribute LifeLink labeled proprietary lyophilized amnion/chorion patch (RegeneLink™)
- Private label of the LifeLink proprietary lyophilized amnion/chorion patch
- RegeneLink™ is gamma irradiated and validated to a sterility assurance level (SAL) of 10^{-6}

Contract Processing

- Transfer an existing processing methodology to LifeLink
- Process amnion, chorion, cord, or dual layer membranes of various sizes using the LifeLink **RegeneCleanse™** proprietary processing method

Dedicated Acquisition Program

- Provide unprocessed placental tissue for further processing

Research & Development/Co-Development

- Experienced scientists on staff
- R&D dedicated cleanrooms
- Jointly develop novel placental tissue product offerings for a multitude of clinical applications

Available Placental Tissue Options

- Amnion
- Chorion
- Umbilical Cord Membrane

RegeneLink™ Lyophilized Amnion/Chorion

Lyophilized Umbilical Cord Membrane

Our Facility

LifeLink Tissue Bank occupies a state-of-the-art 54,000 square foot facility in Tampa, Florida that is dedicated to processing human tissue. Our cutting-edge facility has enabled us to enhance process capabilities and increase capacity to better serve our hospitals, surgeons, patients, and our contract partners.

Our building automation system represents the most advanced technology available.

- Ten, ISO Class 5 cleanrooms
- Air quality that surpasses levels found in the finest operating rooms
- In-house Microbiology Laboratory
- Two Research and Development cleanrooms

Seeking New Partners

LifeLink is a full-service tissue bank for musculoskeletal and placental tissues. LifeLink is looking to partner with distributors and other corporate partners in different ways to harness the power of placental tissues. We are looking for global partners to distribute the LifeLink Amnion-Chorion and potentially other allografts such as umbilical cord either as LifeLink branded products or under a private label. In addition, LifeLink is open to contract processing placental tissue allografts for other processors or developers of allografts. LifeLink acquires placental tissues which can be supplied to processors for their needs. Our entire staff of business development personnel, R&D scientists, Quality, and Processing professionals are willing and able to assist your company in bringing your next allograft to the marketplace.
