

# *RegeneLink*<sup>TM</sup>

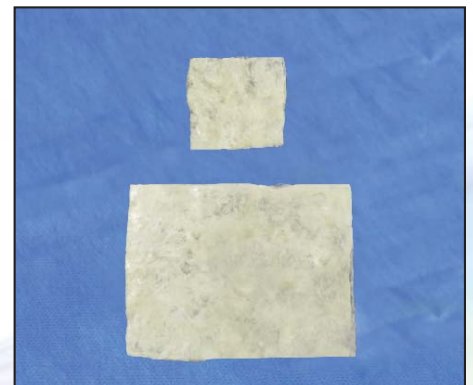

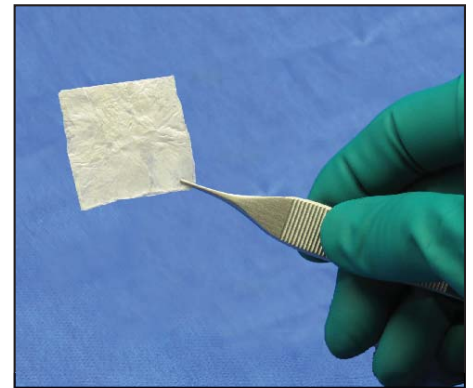

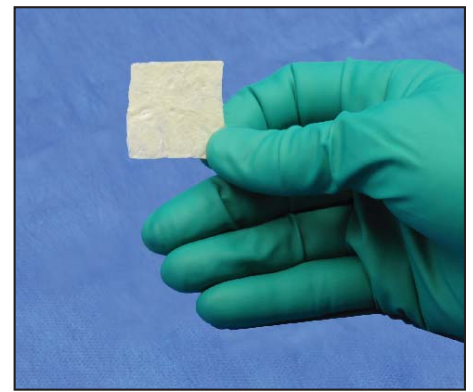

## Placental Tissue

### Amnion/Chorion Patch

*LifeLink is Here to Provide Placental Tissue For Your Patients' Needs*

#### Key Design Features

- May be used as a soft tissue barrier and wound covering
- **RegeneCleanse**<sup>TM</sup> proprietary processing method preserves the tissue's natural structure, inherent growth factors, and matrix proteins
- Can be used lyophilized or hydrated according to facility protocol
- Flexible, conforms to anatomy, and maintains surface contact
- Available in various sizes
- Shelf life of 5 years from time of processing
- Store at ambient conditions with no refrigeration or frozen storage required

# RegeneLink™

## Placental Tissue

### Amnion/Chorion

Description	Catalog #
RegeneLink Amnion Chorion, 2cm x 2cm sheet	BT022AC
RegeneLink Amnion Chorion, 3cm x 3cm sheet	BT033AC
RegeneLink Amnion Chorion, 4cm x 4cm sheet	BT044AC
RegeneLink Amnion Chorion, 4cm x 6cm sheet	BT046AC
RegeneLink Amnion Chorion, 6cm x 6cm sheet	BT066AC
RegeneLink Amnion Chorion, 6cm x 8cm sheet	BT068AC
RegeneLink Amnion Chorion, 7cm x 7cm sheet	BT077AC
RegeneLink Amnion Chorion, 5cm x 9cm sheet	BT059AC
RegeneLink Amnion Chorion, 4cm x 12cm sheet	BT412AC

### The Final Product

LifeLink Tissue Bank has helped transform the development of placental tissue allografts, also known as birth tissue or perinatal tissue allografts, through a proprietary, cutting-edge tissue processing method (**RegeneCleanse™**). This method preserves the extracellular matrix and regulatory proteins like growth factors\*. These allografts can be stored at ambient temperature, rehydrate easily in saline, are gamma irradiated, and are validated to a sterility assurance level (SAL) of 10<sup>-6</sup>.
